

ROOTAL PLUS

PK 0-8-10 solution for fertigation

ROOTAL PLUS has a high concentration in Phosphorus and Potassium. It has been especially designed to ease the root development and to increase the root system in all types of vegetables. **ROOTAL PLUS** promotes and improves the nutrient absorption. Moreover, it increases the strength of the crops, given that it favors the vegetative development and boosts the development of new secondary roots and absorbent hairs.

Dose and instructions for use:

ROOTAL PLUS is a fertilizer designed to be used via fertigation.

- **Horticultural plants, flowers and ornamental transplants:** 2cc of product per plant during the transplant irrigation.
- **Fruit-trees (citrus, olive tree, grapevines, apple tree):** 5cc/seedling or 5 liters/ha.
- **Cuttings:** consult our technical department.

Application season

ROOTAL PLUS can be used in all crops during the rooting and growth period. For horticultural plants, it is advisable to apply the product during the transplant irrigation following the indicated dose. For citrus and fruit-trees, it can be applied throughout the vegetative cycle in order to improve the root development and to increase the nutrient assimilation. It is advisable to be used as a first application during the transplant.

GUARANTEED ANALYSIS

Potassium Oxide (K₂O) soluble in water 11% w/w

Phosphoric Anhydride (P₂O₅) soluble in water 8% w/w
