

VITAL BORO

Boron deficiency corrector in solid format

VITAL BORO corrects Boron deficiencies in all types of crops and it is recommended to fight grapevine winter chlorosis, apple-tree and pear tree numbness, thickened crust and Boron deficiencies in sugar beets. It can be used via foliar application and fertigation.

Dose and instructions for use:

The regular foliar dose is 300-600 g/hl for 1-3 applications every 14-21 days.

- **Citrus, fruit trees and grapevines**, Foliar: 200-300g/hl. Fertigation: 2,5-4 kg/ha.
- **Olives**, Foliar: 250-600 g/hl before and after flowering. Fertigation: 3,5-7 kg/ha.
- **Vegetables**, Foliar: 300-350 g/hl every 30 days. Fertigation: 3,5-5kg/ha.

Application season

VITAL BORO treatments can start when plants have enough foliage and stop at prefloration. Crops should be treated with **VITAL BORO** when a history of this deficiency is known.

GUARANTEED ANALYSIS

Total Boron (B)	17,5% w/w
