

HUMI-AGRO

Humic acids.

HUMI-AGRO is liquid Humic Acids. Its high richness in Humic Acids and Fulvic Acids, obtained from LEONARDITE, are highly recommended for crops aspiring to reach its top profitability. It can be used in surface or drip irrigation and via foliar application, being its effects immediate.

HUMI-AGRO improves the soil structure, increases its water retention capacity and its microelement activity and it works as a chelate for inorganic nutrients, preventing possible microelement deficiencies and increasing Nitrogen and Phosphorus absorption. Moreover, its use contributes to the root growth.

Crops	Dose and instructions for use	Application season
Citrus, banana, avocado and fruit trees	From 20 to 30 liters per hectare and treatment. Repeat 2-3 times.	An application at the beginning of the vegetation, another after the fall of petals, then intervals of 3 to 4 months.
Vegetables and ornamentals	For post-trasplant, the dose is from 15 to 20 liters per hectare spread in 2 irrigations; during the crop, from 20 to 30 liters per hectare spread in 2 applications.	From the second irrigation after transplant until 20 days before harvest.

QUANTITIES	
BOTTLES	1 LITER
TUBS	5 LITERS
	20 LITERS
IBC	1000 LITERS

DECLARADED CONTENT		
Total Humic Extract and Humic Acids	15% w/w	16,2% w/v
Humic Acids	12% w/w	13% w/v
Fulvic Acids	3% w/w	3,24% w/v
Potassium Oxide	2,4% w/w	2,59% w/v
