

VITAL GREEN

Potassium solution K 0-0-8

VITAL GREEN is a pH liquid fertilizer containing solubilized Potassium using organic acids. The Potassium in **VITAL GREEN**, when applied, increases the photosynthetic activity of the leaves, which contributes to an increased CO₂ absorption. This favors the sugar migration to the reserve organs (fruits), which advances its ripening and increases the size of the fruit, improving its quality and color. **VITAL GREEN**, diluted using the recommended dose, it has a weakly acid pH, which allows its mixing with most products without resulting in an alkaline hydrolysis or unwanted precipitation reactions.

Dose and instructions for use:

Foliar application: Dissolve in water using 30-50 cc/hl and spray over the aerial parts of the plants at high pressure and thin drops.

QUANTITIES

BOTTLES	1 LITERS
TUBS	5 LITERS
	20 LITERS
IBC	1000 LITERS

GUARANTEED ANALYSIS

Potassium oxide (K₂O) soluble 8% w/w
in water
