

FAT-MAX

Potassium solution 0-0-33

FAT-MAX is a liquid fertilizer rich in Potassium that increases the fattening and the ripening of the fruits. Its use is recommended for all types of crops, vegetables or fruit trees. Its high concentration in Potassium makes it perfectly suited to maximize the profitability of the harvests.

Dose and instructions for use:

- **Fertigation:** use 20 to 30 liters per hectare divided into 3- 4 applications.
- **Foliar application:** mix 200 to 300 cc per 100 liters of water and spray it over the aerial part of the plants.

Application season

Its application is recommended from sprouting until the end of the vegetative cycle. It is indicated to apply it regularly when the fruits are in stage of growth and maturation. It is recommended to spray it when the leaves are dry. A humid environment favors the absorption of the product, which makes the first and last hours of the day the most suitable ones for the treatment.
