

VITAL NK SOIL

NK 1.8-5.6

VITAL NK SOIL is an organo-mineral liquid fertilizer in suspension format that contains Nitrogen, Potassium, and Organic matter. It is especially recommended to be used via fertigation. Its balanced composition ensures the maximum source of nutrients for the plant, as well as preventing and correcting deficiencies of the main elements. It is indicated for soils with small nutrient concentration.

The application of **VITAL NK SOIL** improves the physical-chemical properties of the soil, such as structure and Cation-Exchange Capacity, and favors the microbial life and the strengthening of the root development. This product provides a bigger exploration of the soil and a bigger absorption surface, which results in an improved the absorption of the nutrients available.

Dose and instructions for use:

FULVIC VITAL is a fertilizer designed to be used via fertigation. The general dose for all types of crops is 75 to 100 L/ha, spread in 3-4 irrigations.

QUANTITIES

BOTTLES	1 LITERS
TUBS	5 LITERS
	20 LITERS
IBC	1000 LITERS

GUARANTEED ANALYSIS

Total organic matter	36% w/w	45% w/v
Total Nitrogen (N)	1.8% w/w	2.2% w/v
Fulvic acids	27% w/w	35% w/v
Humic acids	1% w/w	1.24% w/v
Potassium oxide (K₂O) soluble in water	5.6% w/w	6.9% w/v
Organic carbon	21% w/w	26% w/v

Application season:

VITAL NK SOIL can be used in all types of crops and applied throughout the vegetative cycle.
