

VITAL K

K Solution

The potassium in **VITAL K** increases the photosynthetic activity of the leaf, contributing to an increase in CO₂ absorption and favoring the migration of sugar to the reserve organs (fruits). This process results in an early ripening that increases the fruit's size, quality, and color.

The application of this product is recommended for all types of crops. **VITAL K** has been designed to maximize the crops' yield.

Dose and instructions for use:

Foliar application: Dilute using a dose of 250-500 ml/100 liters of water and spray thinly over the aboveground parts of the plants at high pressure.

GUARANTEED ANALYSIS

Potassium oxide (K ₂ O)	9.75% w/w
------------------------------------	-----------

Application season

In general, it can be used in all types of crops (citrus-trees, olive-trees, grapevines, vegetables, and fruit-trees in general). It is recommended its application throughout the vegetative cycle.
