

VEG AMIGROW-S

Vegetal amino acids

VEG AMIGROW-S is a solid fertilizer that contains vegetal amino acids that get completely absorbed by the plants. The application of **VEG AMIGROW-S** stimulates the vegetal growth, as well as improving the efficacy on critical moments, such as flowering, setting and plant growth.

Its use increases chlorophyll production and improves plants damaged from phytotoxicity, freezes and different stress stages.

Dose and instructions for use:

- **Solanaceae, cucurbits, onion, garlic, celery, beans, chickpeas, soy, lettuce, and cauliflower:** Use 0.5 to 1 kg/ha in two foliar applications, the first one 10 days after the emergency and the second 40 days after the first application.
- **Fruit trees (avocado, citrus, apples, bananas, mangos):** Use 1 to 2 kg/ha via foliar application during stress periods or at the start of the vegetative growth.
- **Roses, Chrysanthemums, and foliage:** Use 0.5 to 1 kg/ha during stress periods or at the start of the vegetative growth.
- **Gramineae (Corn, wheat, barley, sugar cane, and rice):** Use 1 to 2 kg/ha in two foliar applications, the first one 10 days after the emergency and the second 40 days after the first application.

GUARANTEED ANALYSIS

Total amino acids	60% w/w
Free amino acids	50% w/w
Total nitrogen	6,6% w/w
Organic nitrogen	2,45% w/w

Application season

Apply it during the peak activity stages of the plant such as growth, flowering, and fruit growth, as well as stress periods.
