

AMIGROW-S

Vegetal amino acids

AMIGROW-S is a solid fertilizer that contains vegetal amino acids that get completely absorbed by the plants via foliar application and fertigation. The application of **AMIGROW-S** stimulates the vegetal growth, as well as stress and damage resistance, and improves the treatments of plant protection. Also, its use increases the crop yield, even when using soil fertilizers.

Its molecule size guarantees a quick foliar absorption, providing immediate results after its application. Also, it increases the foliar absorption of other fertilizers, improving their efficacy and lowering their required dosage. At the same time, it can be combined with most fungicides, herbicides, and insecticides.

Dose and instructions for use:

When combining with traditional fertilizers, microelements and pesticides, avoiding its combination in strong alkaline solutions and use 5%-20% of **AMIGROW-S**.

- **Organic nutrition:** Use 1 to 1,5 kg/ha in drip irrigation or 3 to 4 kg/ha as base fertilizer in fertigation.
- **Biostimulant:** Use 1 to 1,5 kg/h via fertigation and apply 2 to 5 more times every 7-10 days. For foliar application, use 50-100g/100L and apply 2 to 5 more times every 7-10 days.
- **Natural chelates with microelement fertilizers:** Use 0.8 to 1 kg/ha via fertigation. For foliar application, apply 80 g/hl.
- **Anti-stress:** Use 100 g just after the event and repeat in a few days.
- **Frost damage recovery:** Use 100g/100 L and use via foliar application.
- **Wheat:** Use 0,5-1 kg/ha between 2-3 times during the vegetative cycle.

GUARANTEED ANALYSIS

Free amino acids	70% w/w
Organic matter	83% w/w
Total nitrogen	12,4% w/w
Organic carbon	38% w/w
