

HUMI-AGRO S

Humic acids.

HUMI-AGRO is a granulated organic matter with humic acids that is recommended to increase nutrient absorption, becoming available for immediate assimilation for the roots. This process results in the crops reaching peak profitability. Also, it decreases salinity of the soil, reducing the capacity of humidity retention.

Crops	Dose and instructions for use	Application season
Citrus, banana, and avocado	2-3 kg/ha , repeat 2-3 times.	February, July, and October.
Fruit-trees	2-3kg/ha in 4-5 applications.	From January to September.
Olive-trees	1-3 kg/ha in 2-3 applications.	From March to July.
Vegetables and nurseries	2-3kg/ha or 200-500 / 1000 m ² in 3 applications.	Root development, fruit formation, and growth
Strawberry	2-3kg/ha in 3-4 applications.	From December to April.
Grapevine	2-3kg/ha in 3-4 applications.	From March to September
Extensive, ornamentals and lawns	6-8 kg/ha throughout the year into several applications.	
Seedlings in general	2-3 kg/ha in 3-4 applications	Growth stage

QUANTITIES	
BAGS	1 KG
	5 KG
	20 KG

DECLARADED CONTENT	
Total humic extract and humic acids	80% w/w
Humic Acids	65% w/w
Fulvic Acids	15% w/w
Potassium Oxide	13% w/w
Nitrogen	5% w/w
