

# BIOPOUSSE

NK 5,74-0-2,5

The application of **BIOPOUSSE** increases the fertility of the soil, resulting in the development of improved root systems, vegetal growth and sprouting. Its NK, organic carbon, and amino acids of quick assimilation content makes it an excellent product for short-cycle crops, such as vegetables, seedbeds, and nurseries, as all this elements are assimilated quickly by these types of crops.

## Instructions for use:

**BIOPOUSSE** can be used via foliar application by spraying 250/300 cc/hl and using machines used for phytosanitary treatments. Also, it can be applied through the root, especially via fertigation, following a dose of 25-35 l/ha.

## Dosage and application season

**Olive, almond and walnut trees:** from pre-flowering until the ripening of the fruit, use 30-35 l/ha spread in several irrigations every 14-21 days.

**Citrus, drupes and grapevines;** from sprouting until the ripening of the fruit, use 30-35 l/ha spread in several irrigations every 14-21 days.

**Vegetables and legumes:** from post-transplant until harvest, use 25-30 l/ha spread in several irrigations every 7-14 days.
