

VITAL Ca

Solution of Calcium acetate for foliar application and fertigation

VITAL Ca is a Calcium deficiency corrector used via foliar application with a wide array of uses, such as correcting Bitter Pit (apple) and Apical Rot (tomato), as well as correcting Calcium deficiencies in strawberries, vegetables, citrus and fruit-trees in general and through the fruit's skin (apple, orange, tomatoes, etc). Due to the absence of Nitrogen, it does not delay the coloring of the fruit. Moreover, **VITAL Ca** corrects saline soils and water, and it balances the CIC's soil.

Dose and instructions for use:

Fertigation: 10 cc/m³ (normal soil) and 25-50 cc/m³ of water (saline soil); the minimum consume is 50L/ha per year, and the maximum is 120 L/ha per year. In order to carry out a proper application ask the technical department). **Foliar application:** Diluted in water, start at a dose of 200-300 cc/hl.

Application season

Bitter Pit application: it is recommended to start when the petals fall and repeat every 15-20 days. .

Tomatoes: begin after the set of the fruit and repeat every 15-20 days.

Vegetables, strawberries, citrus and fruit-trees in general: treat when Calcium deficiencies are first noticed. It is recommended to repeat the application two or three times.

GUARANTEED ANALYSIS

Calcium oxide (CaO) soluble in water	9% w/w
