

VITAL B/Mo

CE fertilizer. Boron and Molybdenum solution.

VITAL B/Mo is a Boron, in a Boron ethanolamine format, and Molybdenum deficiency corrector. The joint application of Boron and Molybdenum increases the pollen grain production, the posterior germination of these grains and the pollen tube development, which increases the fruit setting and development.

Dose and instructions for use:

Dilute in water using 150-200 cc/hl and spray over the above-ground parts of the plant. Apply it by wetting the underside and try to avoid the heat of the day.

Fertigation: Dilute 2-3 L/ha in irrigation water.

Application season

It is normally applied during prefloration until the set of the fruit in 2-3 applications every 10-15 days.

GUARANTEED ANALYSIS

Boron (B) soluble in water	1,2% w/w
Molybdenum (Mo) soluble in water	5,3% w/w
